

RANGE 03 · INDICATIVE — FIGURES TO BE CONFIRMED BY FILTERTEC ENGINEERING

# Meltblown & wound depth filters

Depth media for high-turbidity duty: contaminants held through the full thickness of the cartridge.

## AT A GLANCE

Micron rating	1µm – 200µm
Construction / media	Polypropylene, Cotton / glass yarn, Polyester
Max operating pressure	To be supplied
Max operating temperature	To be supplied
Connections / sizes	To be supplied
Certifications	To be supplied
Typical lead time	To be supplied

## KEY POINTS

- Graded-density depth loading
- Meltblown or yarn-wound construction
- Economical pre-filtration

## MATERIALS

Polypropylene · Cotton / glass yarn · Polyester
